

The First African Conference on Mathematics Laayoune Morocco 2022

November, 28-30, 2022 at Laayoune, Morocco

Location: Want to discover Laâyoune? There are a thousand and one ways to do so. On the edge of the Atlantic Ocean and at the gates of the Sahara, Laayoune "the city of the sands", where the sand of the beach meets that of the desert, welcomes visitors in a naturally splendid and varied setting. In less than a century, Laayoune, claimed as the capital of a putative independent Sahrawi state, has experienced a meteoric boom, becoming the premier economic and administrative centre of the Saharan Provinces. Laayoune is the most important city in the south of Morocco. It is located on the Atlantic, 500km south of Agadir on the road to Dakhla and 1048,14km east of Nouakchott.

The aim of the conference: The aim of the conference is to bring experts in mathematics and applications. The primary goal of the conference is to promote research in mathematics. Another goal is to promote scientific information interchange between researchers, and students in Africa and abroad. We invite you to submit original technical papers for presentation to this conference.
